

Nicholas Kuckuck, Roseburg OR

Here is my list, as requested in Electronics Workbench Design Contest. Lorie is my parent, as I am 13. My name is Nicholas Kuckuck. My main source is Electronix Express, which offers a vast variety at low prices. It offers products mainly for educational purposes, I think, but is also good for the hobbyist.

I grouped my list something like this: Tools/test equipment in the first half, electrical parts in the last half. I had a very hard time deciding what was important, as there are so many products. I think in the real world, though, the person would have a bigger budget and would be able to buy supplies as needed. In any case, here is my list.
